An alternative to OCSInventory-Agent, featuring:

➤ A unique agent for all platforms

➤ Unprecedented collection of informations (battery, antivirus, hard drive serial and more)

➤ Wake on Lan

➤ Local inventory using an agent or remote using **SNMP** (for switchs and printers)

➤ Software deployment throught peer to peer: download archive once for the whole network!

➤ **HTTPS** support for inventory and software deployment

➤ Native support for **UTF-8** character encoding

➤ Windows support with **64bit software** inventory

➤ Network discovery

➤ Ready to use packages available for several Operating Systems

FUSION INVENTORY

Total number of printed pages (/ day)

A plugin for GLPI:

➤ Powerful network discovery within GLPI using SNMP, Netbios and Nmap

➤ Easy way to wake computers up (Wake On Lan)

➤ More than **1000** SNMP network devices supported

Cartridge(s)

	80%
Cyan toner :	100%
Magenta toner :	20%
Yellow toner :	0%
Waste bin :	50%

And much more:

➤ A PHP library acting as an OCS server

➤ An active mailing list and an IRC channel

➤ An open community : users, developers and several interested projects (Shinken, GOsa², Unattended-GUI), you?

Port array (50) [Legend]
